Inputs (open)
CORONA KH-4A scans
Sol 1924 sheets
OpenStreetMap
Sentinel-2 2026, GLO-30
1 Candidate points
OSM junctions, bridges, tanks, village nodes, shrines; spaced >= 300 m apart
2 Tie matching
NCC of 700 and 1000 m chips vs OSM roads, S2; sizes agree <= 15 m; RANSAC, blunder screen
3 Validation
affine, poly2, poly3, regularised TPS; check split, LOO, block-CV, bootstrap, Moran's I
4 Propagation
transform bootstrap + tie-threshold range + digitising offset + DSM error, canopy
5 Evidence grading of each CORONA reading against independent positional sources: confirmed, plausible, unsupported or contradicted
